

ENVIRONMENTAL PROTECTION AND WASTE MANAGEMENT POLICY

At our business, we protect the environment, prevent pollution, and place importance on reducing our negative environmental impacts.

For this purpose:

- We comply with legal regulations and strive to reduce our environmental impact.
- We pay attention to effectively separating our waste according to source, category, and hazard classification.
- We recognize that using hazardous substances and chemicals only when necessary and in the required amounts reduces both environmental impacts and waste generation.
- We contribute to the protection of nature by preferring materials labeled as “recyclable” and “environmentally friendly” in our procurement processes. We also strive to create opportunities for reuse.
- We aim to reduce waste generation by using disposable materials such as paper, napkins, toilet paper, and packaging only as much as necessary.
- We store waste correctly in separate designated areas according to its characteristics and deliver it to licensed/authorized companies within the legal storage time limits while maintaining records.
- We strive to use water, energy, and all natural resources efficiently. We share this awareness with our employees, guests, and suppliers.
- We measure our environmental management performance, monitor it through targets, and work continuously to improve our performance.
- We aim to educate our employees about environmental issues and increase their environmental awareness.
